New York's Erie Canal once projected a young nation's power and commercial ambitions across half a continent. Connecting New York City and the Hudson River north of Albany all the way to the Great Lakes, at 363 miles long, it was the second largest canal in the world when it opened in 1825, and one of the most transformative infrastructure projects of America's early history.

A HUMAN-MADE RIVER, MAROONED NO MORE? | Landscape ...

A river is a natural flowing watercourse, usually freshwater, flowing towards an ocean, sea, lake or another river. In some cases a river flows into the ground and becomes dry at the end of its course without reaching another body of water. Small rivers can be referred to using names such as stream, creek, brook, rivulet, and rill. There are no official definitions for the generic term river as ...
