

## *Building Social Relationships A Systematic Approach To Teaching Social Interaction*

### **Building Social Relationships A Systematic**

The BSR program is a systematic social skills program that begins with assessment, and ends with assessment. The program allows parents and practitioners to stop "chasing" problem behaviors, and instead address the underlying causes of problem behaviors and social interaction difficulties.

Capacity building (or capacity development) is the process by which individuals and organizations obtain, improve, and retain the skills, knowledge, tools, equipment and other resources needed to do their jobs competently. It also allows individuals and organizations perform at a greater capacity (larger scale, larger audience, larger impact, etc.).

1. Introduction. Social commerce developed in tandem with the e-commerce evolution. It was introduced by Yahoo in 2005, and quickly became a means for adding value to commercial services through the use of customer engagement by major web companies, such as Amazon, Groupon and eBay (Wang and Zhang, 2012). In 2006, the first academic article appeared that explicitly used the term social commerce.

Interest in conceptualizing, measuring, and applying social network analysis (SNA) in public health has grown tremendously in recent years. While these studies have broadened our understanding of the role that social networks play in health, there has been less research that has investigated the application of SNA to inform health-related interventions.

The commonalities of most definitions of social capital are that they focus on social relations that have productive benefits. The variety of definitions identified in the literature stem from the highly context specific nature of social capital and the complexity of its conceptualization and operationalization. Social capital does not have a clear, undisputed meaning, for [...]
