A circle is a simple closed shape. It is the set of all points in a plane that are at a given distance from a given point, the centre; equivalently it is the curve traced out by a point that moves in a plane so that its distance from a given point is constant. The distance between any of the points and the centre is called the radius. This article is about circles in Euclidean geometry, and, in ...

How to Treat Dark Circles. If your circles are the result of vascular issues, double up on pillows at night to stop blood from building up under your eyes. In the morning, apply a cold compress for about five minutes to constrict the blood vessels, says Jeannette Graf, an associate clinical professor of dermatology at the Mount Sinai School of Medicine in New York City.

I wish my dad would understand this. I get "bonked" a lot faster than he does for whatever reason. Whenever we start riding, I am usually the one pushing forward, but at some point my upper legs suddenly start hurting, I get all whiny and I hate the world - and I especially start being really annoyed with him because he ends to not take me seriously in these situations.

Most of us share a common color vision sensory experience. Some people, however, have a color vision deficiency, which means their perception of colors is different from what most of us see. The most severe forms of these deficiencies are referred to as color blindness. People with color blindness aren't aware of differences among colors that are obvious to the rest of us.
