Oral rehydration therapy (ORT) is a type of fluid replacement used to prevent and treat dehydration, especially that due to diarrhea. It involves drinking water with modest amounts of sugar and salts, specifically sodium and potassium. Oral rehydration therapy can also be given by a nasogastric tube. Therapy should routinely include the use of zinc supplements.

Is daith piercing something that you should try as a migraine treatment? Many people are saying yes. Back in to 2015, a post I wrote criticized articles that touted the benefits of daith piercing, even though they cited little to no evidence. As a result, a huge discussing has started about the benefits and evidence [...]
