

Environmental Philosophy From Animal Rights To Radical Ecology 4th Edition

Environmental Philosophy From Animal Rights

Environmental Ethics. The field of environmental ethics concerns human beings' ethical relationship with the natural environment. While numerous philosophers have written on this topic throughout history, environmental ethics only developed into a specific philosophical discipline in the 1970s. This emergence was no doubt due to the increasing awareness in the 1960s of the effects that ...

Animal studies is a recently recognized field in which animals are studied in a variety of cross-disciplinary ways. Scholars who engage in animal studies may be formally trained in a number of diverse fields, including geography, art history, anthropology, biology, film studies, geography, history, psychology, literary studies, museology, philosophy, communication, and sociology.

Animal studies - Wikipedia

Advocates of animal rights as well as activists for animal liberation hold the view that to deny the most basic needs of sentient creatures—such as the avoidance of pain—to non-human animals, on the basis of species membership alone, is a form of discrimination akin to racism or sexism. Many animal rights advocates argue that non-human animals should be regarded as persons and members of ...

The Modern Environmental Movement: Jewish Perspectives. by Preston Hunter The modern environmental movement is a growing social force, akin in many ways to traditional world religions, one of the oldest of which is Judaism.

The Modern Environmental Movement: - Adherents.com

Environmental ethics is a branch of philosophy that considers the moral relations between human beings and their natural environment. As a field of study, it assumes that humans have certain responsibilities to the natural world, and it seeks to help people and their leaders become aware of them and to act responsibly when they do things that impact the natural world.

Despite the overwhelming evidence of the environmental disaster of animal agriculture, there seems to be a growing movement – promoted by environmentalists themselves – that is against vegan diets, for reasons of environmental sustainability. This trend is encouraged by the strange idea being promoted that vast quantities of soy are required to produce vegetarian foods.
