Psychopharmacology (from Greek ψυχή, psūkhē, 'breath, life, soul'; φάρμακον, pharmakon, 'drug'; and -λογία, -logia) is the scientific study of the effects drugs have on mood, sensation, thinking, and behavior. It is distinguished from neuropsychopharmacology, which emphasizes the correlation between drug-induced changes in the functioning of cells in the nervous system and ...

Psychopharmacology - Wikipedia

There are many different herbs for anxiety and depression, as these can often have soothing, anxiolytic, sedative or detoxifying powers. Anxiety is often misunderstood, as people are quick to write off anxiety as being stressed or overwhelmed by work or personal life.

Herbs For Depression - Herbs Info

DMT, or N,N-Dimethyltryptamine, is a naturally occurring chemical found in both plants and animals. It is the active hallucinogenic compound in ayahuasca, the Quechua name for a tea brewed from the shrub *Psychotria viridis*, which is used for ritual purposes by the indigenous people in the Amazon. See our ayahuasca guide for more on this psychedelic brew.
