Classification by composition. There are terrestrial, or rocky planets, the ones made up mostly of rock and metal. These planets are Mercury, Venus, Earth and Mars.. The terrestrial planets are have relatively high densities, slow rotation, solid surfaces, no rings and few satellites.

Classification of the Solar System - Free Lesson Plans For ...

Cassini revealed in great detail the true wonders of Saturn, a giant world ruled by raging storms and delicate harmonies of gravity. Cassini carried a passenger to the Saturn system, the European Huygens probe —the first human-made object to land on a world in the distant outer solar system.. After 20 years in space — 13 of those years exploring Saturn — Cassini exhausted its fuel supply.

Overview | Cassini - NASA Solar System Exploration

Why not combine fun & learning with this fun tutorial for how to make a Solar System Costume. If you can sew a button you can be the solar system.

DIY Solar System Costume - Suburban Wife, City Life
