### **Stick Insects Of The Continental**

Stick insects are insects in the order Phasmatodea (or Phasmida).. The whole order is camouflaged as either sticks or leaves. Leaf insects are generally the family Phylliidae.They are found in south and southeast Asia to New Zealand.. Over 3,000 species have been described. The name Phasmatodea comes from Ancient Greek φάσμα phasma, meaning an apparition or phantom.

A bird born to run, the Greater Roadrunner can outrace a human, kill a rattlesnake, and thrive in the harsh landscapes of the Desert Southwest. Roadrunners reach two feet from sturdy bill to white tail tip, with a bushy blue-black crest and mottled plumage that blends well with dusty shrubs. As they run, they hold their lean frames nearly parallel to the ground and rudder with their long tails.

In summer it can seem that every patch of woods in the eastern United States rings with the rolling song of the Carolina Wren. This shy bird can be hard to see, but it delivers an amazing number of decibels for its size. Follow its teakettle-teakettle! and other piercing exclamations through backyard or forest, and you may be rewarded with glimpses of this bird's rich cinnamon plumage, white ...
