Spool-a-Matic is an IBM i based software utility that converts IBM i spooled files into industry standard file formats and places the resulting stream file into any directory in the IBM i's Integrated File System. Spooled files can be split into multiple stream files based on data found on the page. This is ideal for separating pages by branch, by customer, or by other criteria.

2-inch quadruplex video tape (also called 2″ quad, or just quad, for short) was the first practical and commercially successful analog recording video tape format. It was developed and released for the broadcast television industry in 1956 by Ampex, an American company based in Redwood City, California. The first videotape recorder using this format was built and created in the same year.
