The Everman Journal

Caramon Majere (Younger), human, was the first born son of a woodcutter and the twin of Raistlin Majere, with a complicated childhood. Caramon was strapping and healthy, while Raistlin was so sickly that the midwife feared he would die as an infant. Raistlin had to be nursed to health continuously by their half-sister, Kitiara.

Methionine synthase catalyzes the final step in the regeneration of methionine(Met) from homocysteine(Hcy). The overall reaction transforms 5-methyltetrahydrofolate(N 5-MeTHF) into tetrahydrofolate (THF) while transferring a methyl group to Homocysteine to form Methionine. Methionine synthase is the only mammalian enzyme that metabolizes N 5-MeTHF to regenerate the active cofactor THF.
